# Power cable NYY-J/-O acc. to VDE 0276-603

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	PVC DIV 4
<b>sheathing material:</b>	PVC DMV 5
<b>colour of outer sheath:</b>	black
<b>meter mark:</b>	yes
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>UV-resistant:</b>	yes
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature,</b>	70 °C
<b>fixed:</b>	
<b>temperature, moved/during installation:</b>	-5 - +70 °C

	NYY-J	NYY-O
<b>nominal voltage Uo:</b>	600 V	600 V
<b>nominal voltage U:</b>	1 kV	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV	1,2 kV
<b>test voltage:</b>	4 kV	4 kV

**Application:** For fixed installation in buildings, in free air, in ground and in water.

<b>Switzerland:</b>	TT
<b>Denmark:</b>	PVILD
<b>Norway:</b>	PFXP 0,6/1 kV
<b>Austria:</b>	E-YY
<b>Russia:</b>	BBГ

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

## Core identification

number of cores	with protective conductor	without protective conductor
1	green-yellow	black
2	-	blue, brown
3	green-yellow, blue, brown	brown, black, grey
4	green-yellow, brown, black, grey	blue, brown, black, grau
5	green-yellow, blue, brown, black, grey	blue, brown, black, grey, black

The current rating are calculated for 30 °C ambient temperature and standard utility load flow.

RI	conductor resistance
Wi	thickness of insulation
I <sub>bl</sub>	ampacity (in air)
I <sub>be</sub>	ampacity (in ground)
I <sub>k</sub>	short circuit current (1 s)
L <sub>b</sub>	specific inductivity
R <sub>bv</sub>	bending radius, fixed installation
W <sub>m</sub>	thickness of outer sheath
D <sub>A</sub>	outer diameter
F <sub>zv</sub>	tensile strength (during installation)
Cu	copper
G	weight

# Power cable NYY-JZ/-OZ acc. to VDE 0276-627

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid, class 1
<b>insulation:</b>	PVC DIV 4
<b>sheathing material:</b>	PVC DMV 5
<b>colour of outer sheath:</b>	black
<b>meter mark:</b>	yes
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>UV-resistant:</b>	yes
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature,</b>	70 °C
<b>fixed:</b>	
<b>temperature, moved/during installation:</b>	-5 - +70 °C

## NYY-JZ

<b>nominal voltage Uo:</b>	600 V	600 V
<b>nominal voltage U:</b>	1 kV	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV	1,2 kV
<b>test voltage:</b>		
4 kV                          4 kV		

**Application:** For fixed installation in buildings, in free air, in ground and in water.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

RI	conductor resistance
Wi	thickness of insulation
I <sub>bl</sub>	ampacity (in air)
I <sub>be</sub>	ampacity (in ground)
I <sub>k</sub>	short circuit current (1 s)
L <sub>b</sub>	specific inductivity
R <sub>bv</sub>	bending radius, fixed installation
W <sub>m</sub>	thickness of outer sheath
D <sub>A</sub>	outer diameter
F <sub>zv</sub>	tensile strength (during installation)
Cu	copper
G	weight

# Power cable NAYY-J/ O acc. to VDE 0276-603

**faber  
kabel**

<b>conductor material:</b>	aluminium
<b>insulation:</b>	PVC DIV 4
<b>sheathing material:</b>	PVC DMV 5
<b>colour of outer sheath:</b>	black
<b>meter mark:</b>	yes
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>UV-resistant:</b>	yes
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature,</b>	70 °C
<b>fixed:</b>	
<b>temperature, moved/during installation:</b>	-5 - +70 °C

	NAYY-J	NAYY-O
<b>nominal voltage Uo:</b>	600 V	600 V
<b>nominal voltage U:</b>	1 kV	1 kV
<b>maximum permitted</b>	1,2 kV	1,2 kV
<b>operating voltage in 3-phase systems:</b>		
<b>test voltage:</b>	4 kV	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)	colours acc. VDE 0293 (HD308)

**Application:** For fixed installation in buildings, in free air, in ground and in water.

**Austria:** E-AYY

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Self-supporting aerial power cable (N)Y(Zg)2Y

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid, class 1
<b>insulation:</b>	PVC DIV 4
<b>reinforcing element:</b>	in outer sheath embedded glass yarns
<b>sheathing material:</b>	polyethylene 2YM1
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature, fixed:</b>	-20 - +70 °C
<b>temperature, moved/during installation:</b>	5 - 70 °C
<b>bending radius, fixed installation:</b>	10 x DA
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** The cable is designed for self supporting aerial outdoor installation up to support distances of 50 m. For fixed installation inside of buildings and for direct burial in earth. The construction of the support system assists the pulling in of cable, so that the cable can be pulled into conduits (gas- and water pipelines) over longer distances.

**Additional information:** Glass yarns are embedded into the outer sheath as strength member.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FRNC power cable N2XCH

## acc. to VDE 0276-604

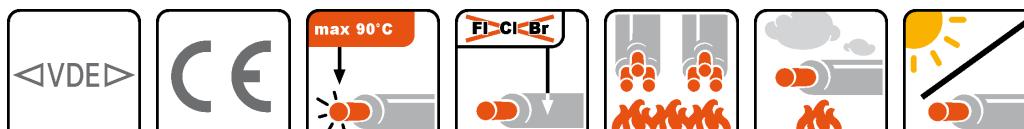

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	XLPE 2XI1
<b>concentric conductor:</b>	Cu
<b>sheathing material:</b>	FRNC-compound HM4
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-30 - +70 °C
<b>temperature, moved/during installation:</b>	-5 - +70 °C
<b>bending radius, fixed installation:</b>	15 x DA
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** Low-smoke, zero-halogen flame retardant power cable. For fixed indoor and outdoor installation as well as in concrete, but not for direct burial in ground or application in water.

**Finnland:** XCMK-HF F4B  
**Sweden:** FXQJ

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	XLPE
<b>sheathing material:</b>	special FRNC compound
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +70 °C
<b>installation:</b>	
<b>bending radius, fixed</b>	12 x DA
<b>installation:</b>	
<b>nominal voltage Uo:</b>	N2XH-J AFUMEX +1000
<b>nominal voltage U:</b>	600 V
<b>test voltage:</b>	1 kV
<b>core identification:</b>	4 kV
<b>colours acc. VDE 0293 (HD 308); more than 5 cores: gn-ye + numbers</b>	N2XH-O AFUMEX +1000
 	600 V
 	1 kV
 	4 kV

**Application:** Low-smoke, zero-halogen flame retardant power cable. For fixed indoor and outdoor installation as well as in concrete, and for direct burial in ground in possibly flooded areas. The cable complies also with IEC 60501-1.

**Additional information:** AFUMEX is a brand of the Prysmian Group

**Finnland:** MCMK

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FRNC power cable AFUMEX plus 1000 N2XCH acc. to VDE 0276-604

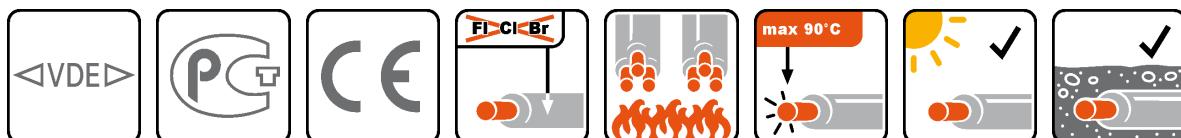

**faber**  
**kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	XLPE
<b>concentric conductor:</b>	Cu
<b>sheathing material:</b>	special FRNC compound
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>maximum temperature at conductor:</b>	90 °C
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV

**Application:** Low-smoke, zero-halogen flame retardant power cable. For fixed indoor and outdoor installation as well as in concrete, and for direct burial in ground in possibly flooded areas.

**Additional information:** AFUMEX is a brand of the Prysmian Group

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Power cable (N)YYök-J

- BAM Pruef. - Nr. VI. 34/10389/96

<b>conductor material:</b>	bare copper
<b>insulation:</b>	PVC YI4
<b>sheathing material:</b>	PVC YM3
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature, fixed:</b>	70 °C
<b>temperature, moved/during installation:</b>	-5 - +70 °C
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV

**Application:** Energy distribution cable. For fixed installation inside of buildings, for direct burial in earth, in water as well as in concrete, designed for power supply and control of oil and fuel pumps. The resistance against oil and fuel is proofed by BAM-test report VI. 34/10389/96 and tests acc. to VDE 0472 p. 803, Test B.

# Power cable Cu/XLPE/PVC/ SWA/PVC acc. to BS 5467

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	stranded, class 2
<b>insulation:</b>	XLPE
<b>armour:</b>	round steel wire, galvanized
<b>sheathing material:</b>	PVC
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-30 - +70 °C
<b>temperature, moved/during installation:</b>	0 - 70 °C
<b>bending radius, fixed installation:</b>	8 x DA
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>test voltage:</b>	3,5 kV
<b>protective conductor:</b>	no

**Application:** Distribution cable for industry constructions and switching boxes. For fixed installation inside of buildings, direct burial in earth, in water as well as in concrete and for heavy-duty mechanical load.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	stranded, class 2
<b>insulation:</b>	XLPE
<b>armour:</b>	round steel wire, galvanized
<b>sheathing material:</b>	PVC
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-30 - +70 °C
<b>temperature, moved/during installation:</b>	0 - 70 °C
<b>bending radius, fixed installation:</b>	8 x DA
<b>nominal voltage U<sub>0</sub>:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>test voltage:</b>	3,5 kV
<b>protective conductor:</b>	yes

**Application:** Distribution cable for industry constructions and switching boxes. For fixed installation inside of buildings, direct burial in earth, in water as well as in concrete and for heavy-duty mechanical load.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>operating voltage in 3-phase systems:</b>			
<b>test voltage:</b>	21 kV	63 kV	42 kV

**Application:** For installation in ground, in water, outdoors, indoors and in cable ducts for power stations, industry, and distribution networks. The good installation properties of this cable make installation easy, even on difficult routes. Acc. to VDE 0276-603 cables must be protected against direct sun irradiation.

**Austria:** E-A2XHCY

**Russia:** АПвЭВ

DI	diameter of conductor
RI	conductor resistance
Wi	thickness of insulation
Ibl	ampacity (in air)
Ibe	ampacity (in ground)
Ik	short circuit current (1 s)
Rbv	bending radius, fixed installation
Wm	thickness of outer sheath
DA	outer diameter
Fzv	tensile strength (during installation)
Cu	copper
Al	Aluminium
G	weight

# Medium voltage cable NA2XS2Y

## acc. to VDE 0276-620

**conductor material:** aluminium  
**conductor construction:** stranded, class 2  
**insulation:** XLPE DIX8  
**sheathing material:** polyethylene DMP2  
**colour of outer sheath:** black  
**flame retardant:** no  
**maximum temperature at conductor:** 90 °C  
**max. operating temperature,** 70 °C  
**fixed:**  
**temperature, moved/during installation:** -20 - +70 °C  
**bending radius, fixed installation:** 15 x DA  
**partial discharge:** 2 pC

	NA2XS2Y 6/10 kV	NA2XS2Y 12/20 kV	NA2XS2Y 18/30 kV
<b>nominal voltage Uo:</b>	6 kV	12 kV	20 kV
<b>nominal voltage U:</b>	10 kV	20 kV	30 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	12 kV	24 kV	36 kV
<b>test voltage:</b>	21 kV	42 kV	63 kV

**Application:** For installation in ground, in water, outdoors, indoors and in cable ducts for power stations, industry, and distribution networks. The high mechanical durability of the PE-sheath permits strong mechanical stress during installation or during operation. For installation in cable ducts and indoors must be considered that the PE sheath is halogen-free, but not flame retardant according to DIN VDE 0482-332-1.

**Austria:** E-A2XHC2Y

**Russia:** АПвЭП

<b>nominal voltage U:</b>	10 kV	20 kV	30 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	12 kV	24 kV	36 kV
<b>test voltage:</b>	21 kV	42 kV	63 kV

**Application:** For installation in ground, in water, outdoors, indoors and in cable ducts for power stations, industry, and distribution networks. The high mechanical durability of the laminated PE-sheath permits strong mechanical stress during installation or during operation. The water blocking tape avoids water propagation inside the cable.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

**Application:** For installation in ground, in water, outdoors, indoors and in cable ducts for power stations, industry, and distribution networks. The high mechanical durability of the laminated PE-sheath permits strong mechanical stress during installation or during operation. The water blocking tape avoids water propagation inside the cable.

# Overhead line (N)FA2X

## acc. to VDE 0274 (Z)

<b>conductor material:</b>	aluminium
<b>conductor construction:</b>	stranded, class 2
<b>insulation:</b>	XLPE
<b>UV-resistant:</b>	yes
<b>max. operating temperature,</b>	-20 - +80 °C
<b>fixed:</b>	
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted</b>	1,2 kV
<b>operating voltage in 3-phase systems:</b>	

**Application:** For overhead distribution, mainly for public distribution with a highest voltage not above 1,2 kV.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Screened building wire (N)YM(St)-J

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>insulation:</b>	PVC TI1
<b>screen:</b>	foil
<b>drain wire:</b>	yes
<b>sheathing material:</b>	PVC TM1
<b>colour of outer sheath:</b>	gray RAL 7035
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>max. operating temperature,</b>	70 °C
<b>fixed:</b>	
<b>temperature, moved/during installation:</b>	5 - 70 °C
<b>nominal voltage U<sub>o</sub>:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** This cable has a static foil screen for limiting its irradiated electromagnetic field in areas with high requirements to EMC as computer rooms, hospitals as well as in living rooms with high sensitivity to electrical and/or magnetical fields. For installation on and under plaster in dry and wet rooms, as well as inside of walls or in concrete. Also for outdoor use, if the cable is protected against direct sun irradiation.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Screened FRNC installation wire (N)HXMH(St)-J

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>insulation:</b>	XLPE 2X11
<b>screen:</b>	foil
<b>drain wire:</b>	yes
<b>sheathing material:</b>	FRNC-compound HM2
<b>colour of outer sheath:</b>	gray RAL 7035
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>maximum temperature at conductor:</b>	70 °C
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** Flame retardant building wire, for installation on and under plaster in dry and wet rooms, as well as in concrete. The cable is screened to limit the propagation of electromagnetic field of the conductors. It is designed for application in EMC-sensitive environments as hospitals, data processing facilities, laboratories but also in living rooms.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# PVC-insulated wires H07V-U acc. to EN 50525-2-31

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid, class 1
<b>insulation:</b>	PVC TI1
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	70 °C
<b>temperature, moved/during installation:</b>	5 - 70 °C
<b>bending radius, fixed installation:</b>	4 x DA
<b>nominal voltage Uo:</b>	450 V
<b>nominal voltage U:</b>	750 V
<b>test voltage:</b>	2,5 kV

**Application:** For laying in pipes on top of or under plaster and in closed installation ducts and for internal wiring of machinery, switchgear and distributor systems. The cable is not suitable for direct laying under plaster.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Flat light-chain cable H05RNH2-F acc. to EN 50525-2-82

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	rubber (EPR) EI4
<b>sheathing material:</b>	rubber (CR) EM2
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	60 °C
<b>max. operating temperature, fixed:</b>	-25 - +60 °C
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** Cable for dry and wet rooms as well as outdoor for temporary installation of fairy lights.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded class 6, up from 35 sqmm class 5
<b>insulation:</b>	rubber (EPR) 3GI3, halogen-free
<b>screen:</b>	Cu-braid, tinned
<b>screen coverage:</b>	80 %
<b>sheathing material:</b>	rubber (CR) 5GM3
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>ozone resistant:</b>	yes
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-40 - +80 °C
<b>temperature, moved/during installation:</b>	-35 - +80 °C
<b>bending radius, fixed installation:</b>	5 x DA
<b>bending radius, moved application:</b>	10 x DA
<b>nominal voltage U<sub>o</sub>:</b>	300 V
<b>nominal voltage U:</b>	500 V

**Application:** For the connection of mobile parts of machine tools, conveyor plants and major items of equipment, if the cable are exposed to bends in only one level. For installation in dry, damp and wet areas as well as outdoor. Due to the screening of each single core the cable has improved EMC performance.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Roller blind cable A05RN-F

FACAB JALOUSIE A05RN-F 04G0,75 UV-RESISTANT 2014 →

**conductor material:** bare copper

**conductor construction:** fine stranded, class 5

**colour of outer sheath:** black

**flame retardant:** VDE 0482-332-1-2/IEC 60332-1

**ozone resistant:** yes

**maximum temperature at conductor:** 60 °C

**max. operating temperature, fixed:** -25 - +60 °C

**core identification:** green-yellow, blue, brown, black

**Application:** For the fixed and flexible connection of electrical appliances at low mechanical stresses in dry, damp and wet areas and outdoors. Thanks to the wire designation and the UV-resistant outer sheath, the cables are particularly suitable for the connection of roller blind and Venetian blind drives.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Heat resistant wire H07G-K acc. to EN 50525-2-42

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	rubber EI3
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	110 °C
<b>max. operating temperature, fixed:</b>	-40 - +110 °C
<b>temperature, moved/during installation:</b>	-25 - +110 °C
<b>bending radius, fixed installation:</b>	7 x DA
<b>nominal voltage Uo:</b>	450 V
<b>nominal voltage U:</b>	750 V
<b>test voltage:</b>	2,5 kV

**Application:** For installation in pipes on, in and under plaster as well as in closed cable ducts and for internal wiring of devices, switching and distribution system with ambient temperatures over 55 °C.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Silicone insulated wires SiF

<b>conductor material:</b>	tinned copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	silicone rubber
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>maximum temperature at conductor:</b>	180 °C
<b>max. operating temperature, fixed:</b>	-60 - +180 °C
<b>bending radius, fixed</b>	6 x DA
<b>installation:</b>	
<b>bending radius, moved</b>	15 x DA
<b>application:</b>	
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV

**Application:** For operation at environment temperatures above 55 °C, for internal wiring of lamps, heating equipment and electrical appliances as well as for switching boxes and distributions.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

**Application:** For connection of mobile electrical appliances without mechanical stress at increased environmental temperatures, for example in steel-works, but also at low temperatures. Insulation and sheath are resistant against most oils, acids, lyes and oxydants. For fixed installation in mechanical protected conduits. For indoor and outdoor use.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Screened silicone cord SiHFCSI

<b>conductor material:</b>	tinned copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	silicone rubber
<b>inner sheath:</b>	silicone rubber
<b>screen:</b>	Cu-braid, tinned
<b>sheathing material:</b>	silicone rubber
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	180 °C
<b>max. operating temperature,</b>	-60 - +180 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	5 x DA
<b>installation:</b>	
<b>bending radius, moved</b>	10 x DA
<b>application:</b>	
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD 308); more than 5 cores: gn-ye + numbers

**Application:** For connection of electrical appliances without mechanical stress at increased environmental temperatures, for example in steel-works, but also at low temperatures. Insulation and sheath are resistant against most oils, acids, lyes and oxydants. For indoor and outdoor use. The cable is designed for connections in EMI-sensitive applications.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>maximum temperature at conductor:</b>	180 °C
<b>max. operating temperature,</b>	-50 - +180 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	6 x DA
<b>installation:</b>	

	1,1/1,9 kV	3,3/4,2 kV	13,8/15,0 kV
<b>nominal voltage Uo:</b>	1,1 kV	3,3 kV	13,8 kV
<b>nominal voltage U:</b>	1,9 kV	4,2 kV	15 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	2,2 kV	6,6 kV	27,6 kV
<b>test voltage:</b>	4 kV	10 kV	31 kV

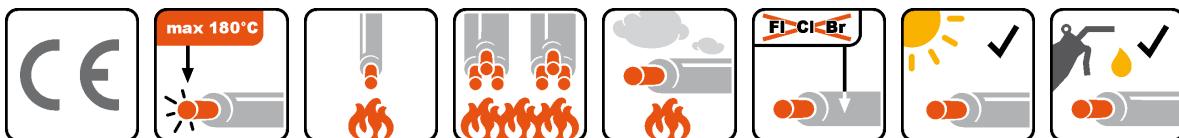

**Construction:**

- conductor
- separating tape
- insulation
- enamel varnished yarn braiding

**Application:** Flexible connecting cable for increased ambient temperatures, for example transformers, generators and motors. For installation indoors and in cable ducts for power stations, industry and distribution networks etc. The halogen-free sheath/protection is resistant against transformer oil and fuel oil.

**Additional information:** The nominal voltage is identified by the color:

- 1,1 kV - yellow
- 3,3 kV - reddish-brown
- 6,6 kV - grey
- 13,8 kV- black

**Application:** Singlecore cables are used in short lengths, e.g. for connection of switchgear cubicles and for connection of mobile transformer substations. When laying and during operation care should be taken to protect them against excessive mechanical stress. The outer semiconducting layer must be heated before removing.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Heat resistant pendant cord with steel cord H05V2V2D3-F (NYPLYw) acc. to EN 50525-2-11

**faber**  
**kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	PVC TI3
<b>self supporting element:</b>	steel
<b>sheathing material:</b>	PVC YM3
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	5 - 90 °C
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	green-yellow, blue, brown, black

**Application:** As drawbars as well as for fixed installation in lights (not permitted for the connection of localvariable loads). Breaking load of the strength member 250 N.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# LSOH wires with increased temperature range FACAB THERM 145

**faber**  
**kabel**

<b>conductor material:</b>	tinned copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	cross-linked polyolefin-copolymer
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>ozone resistant:</b>	yes
<b>maximum temperature at conductor:</b>	145 °C
<b>max. operating temperature, fixed:</b>	-55 - +145 °C
<b>temperature, moved/during installation:</b>	-35 - +120 °C
<b>bending radius, fixed</b>	4 x DA
<b>installation:</b>	
<b>bending radius, moved</b>	6 x DA
<b>application:</b>	

**Application:** This electron beam cross-linked halogen-free insulated wire is used for the connection of lights, heating units and machines in environments with increased temperatures. In addition to a long working life, the high permissible conductor temperature also guarantees increased current carrying capacity in comparison to conventional cables. Not for installation on ladders or trays.

**Additional information:** Nominal voltage:

up to 1,0 sqmm 300/500 V

from 1,5 sqmm 450/750 V (600/1000 V for fixed and protected installation)

Test voltage: 3500 V

# Heat resistant cable

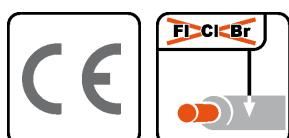

## FACAB THERM 750

**faber  
kabel**

<b>conductor material:</b>	nickel
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	glass fiber covering + glass fiber braiding, silicone impregnated
<b>max. operating temperature,</b>	-60 - +750 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	18 x DA
<b>installation:</b>	
<b>nominal voltage U:</b>	400 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	nature color

**Application:** Thanks to its extremely large usage temperature range, this cable is particularly suitable for use in aerospace applications, in power stations and in chemicals and metallurgy businesses. The conductor resistances varying from copper conductors must be observed!

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Fire signalisation cable J-Y(St)Y ... Lg

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid, class 1
<b>insulation:</b>	PVC TI1
<b>stranding unit:</b>	pair
<b>stranding:</b>	layers
<b>screen over strand:</b>	foil
<b>drain wire:</b>	yes
<b>sheathing material:</b>	PVC TM1
<b>colour of outer sheath:</b>	red
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +50 °C
<b>installation:</b>	
<b>bending radius, fixed</b>	7,6 x DA
<b>installation:</b>	
<b>insulation resistance:</b>	100 MΩ·km
<b>operating capacity:</b>	100 nF/km
<b>nominal voltage U:</b>	300 V
<b>core identification:</b>	colours acc. VDE 0815

**Application:** For connection of telecommunication units inside of buildings in dry and wet rooms, also outdoors if the cable is protected against direct sun irradiation. The special imprint identifies the cable as fire signalisation cable.

**Additional information:** Stranding: cores twisted into pairs (2-pairs cable stranded as star-quad), pairs stranded in layers. Core identification: two-pair cable: red, black, white, yellow. More than two-pairs are in continuous sequence: white-blue, white-yellow, white-green, white-brown, white-black. In the 1-st pair of each layer there is one red core in place of the white one.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	cl.2, 7-wired construction
<b>insulation:</b>	PVC
<b>screen over strand:</b>	foil
<b>drain wire:</b>	yes
<b>sheathing material:</b>	PVC
<b>colour of outer sheath:</b>	grey
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>max. operating temperature,</b>	-5 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +50 °C
<b>installation:</b>	
<b>bending radius, fixed</b>	7,5 x DA
<b>installation:</b>	
<b>maxi-termi-point termination:</b>	yes
<b>impedance:</b>	130 Ohm
<b>insulation resistance:</b>	100 MOhmxkm
<b>specific inductivity:</b>	0,7 mH/km
<b>coupling K1:</b>	200 pF
<b>operating capacity:</b>	120 nF/km
<b>nominal voltage U:</b>	600 V

**Application:** In measuring and control circuits of industrial installations for transfer of analog and digital data up to 10 kHz. For fixed installation inside of buildings The version with blue outer sheath is suitable for application in intrinsically-safe circuits.

**Additional information:** stranding: cores into pairs (2-pair as a star-quad), 4 pairs into a bunch, bunches in layers.

Identification of bunches by numbered helix.

core identification: blue, red; grey, yellow; green, brown; white, black;

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

## Construction:

- two cores twisted into pairs + 1 communication core 0,5 sqmm orange (multi pair-version)
- pairs layed up in layers
- separating tape
- screen of Al coated foil with tinned drain wire
- outer sheath

**Application:** For data communication with transmission rates up to 200 kBit/s in MSR- and EDP systems.

Transmission characteristics are guaranteed by high-quality stranding and screening. For fixed installation in dry and damp areas, in outdoor and direct burial in earth.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Cable for industrial electronics

## JE-Y(St)Y acc. to VDE 0815

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid
<b>insulation:</b>	PVC YI3
<b>covering of strand:</b>	Plastic-foil
<b>screen:</b>	Plastic coated Al-foil + solid copper drain wire
<b>sheathing material:</b>	PVC TM1
<b>colour of outer sheath:</b>	grey RAL 7032, alternative blue RAL 5015
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	7,5 x DA
<b>installation:</b>	
<b>coupling K1:</b>	200 pF
<b>operating capacity:</b>	100 nF/km
<b>loop resistance:</b>	73,2 Ohm/km
<b>nominal voltage U:</b>	225 V
<b>test voltage:</b>	0,5 kV
<b>core identification:</b>	colours + rings

**Application:** For signal transmission between electronic devices, in computer systems or process control units. For installation in dry and wet rooms.

**Additional information:** Stranding: cores twisted into pairs, 4 pairs layed up into sub-units (2-pairs cable stranded as one star-quad), sub-units layed up in layersCore identification:The basic colour of each bunch are continuous sequence: blue, red, grey, yellow, green, brown, white, blackThe bundles are identified by the colour of the rings on the insulation or a colored tape.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Cable for industrial electronics JE-LiYCY ... FR

**faber  
kabel**

<b>conductor construction:</b>	Strand, 7-wired construction
<b>insulation:</b>	PVC TI1
<b>covering of strand:</b>	Plastic-foil
<b>screen:</b>	Cu-braid, tinned
<b>sheathing material:</b>	PVC TM1
<b>colour of outer sheath:</b>	gray RAL 7032
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +50 °C
<b>installation:</b>	
<b>bending radius, fixed</b>	10 x DA
<b>installation:</b>	
<b>insulation resistance:</b>	100 MOhmxkm
<b>operating capacity:</b>	120 nF/km
<b>loop resistance:</b>	78,4 Ohm/km
<b>nominal voltage U:</b>	225 V
<b>test voltage:</b>	500 kV
<b>core identification:</b>	colours acc. VDE 0815

**Application:** For signal transmission between electronic devices, in computer systems or process control units with increased requirements to electromagnetic compatibility. For installation in dry and wet rooms.

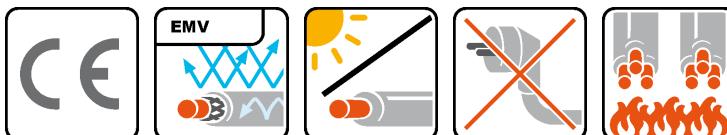

**Additional information:** Stranding:

- cores twisted into pairs
- 4 pairs layed up into sub-units
- sub-units layed up in layers

Core identification:

The basic colour of each bunch are continuous sequence: blue, red, grey, yellow, green, brown, white, black

The bundles are identified by the colour of the rings on the insulating core.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>nominal voltage U:</b>	500 V	500 V	500 V
<b>test voltage:</b>	2 kV	2 kV	2 kV
<b>core identification:</b>	gn-ye + numbers	numbers	colours acc. VDE 0293 (HD308)

**Application:** Flexible power, process control and instrumentation cable for industry and machinery environment with increased requirements to electromagnetic compatibility. The cable is resistant against most usual chemicals, oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

**Application:** Optimized control and instrumentation cable for industry and machinery environment with increased requirements to electromagnetic compatibility. The inner sheath has been replaced by a separator tape, hence diameter, bending radius and weight are less. The cable is resistant against most usual chemicals, oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

<b>nominal voltage U:</b>	500 V	500 V
<b>core identification:</b>	gn-ye + numbers	numbers

**Application:** Flexible, armoured power, process control and instrumentation cable for industry and mechanical engeneeringt. The cable is resistant against most usual chemicals, oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Harmonised control cable

## H05VV5-F acc. to EN 50525-2-51

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	PVC TI2
<b>sheathing material:</b>	PVC TM5
<b>colour of outer sheath:</b>	gray RAL 7001
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>oil resistant:</b>	EN 60811-2-1
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature, fixed:</b>	-40 - +70 °C
<b>temperature, moved/during installation:</b>	-5 - +70 °C
<b>bending radius, fixed installation:</b>	4 x DA
<b>nominal voltage Uo:</b>	300 V
<b>nominal voltage U:</b>	500 V
<b>test voltage:</b>	2 kV
<b>core identification:</b>	gn-ye + numbers

**Application:** Flexible power, process control and instrumentation cable for industry and machinery environment. The cable is resistant against most usual chemicals, oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# EMC connecting cable 2YSL(St)CYv

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	polyethylene
<b>screen:</b>	aluminium-foil + copper-braiding, tinned
<b>screen coverage:</b>	75 %
<b>sheathing material:</b>	PVC, enforced
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>oil resistant:</b>	EN 60811-2-1
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +70 °C
<b>installation:</b>	
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** The cable has been developed for connecting motors to inverse rectifiers under consideration of EMC-requirements. It may be used under medium mechanical stress for fixed installations and temporary movement. Also for outdoor installation, but not for direct burial. The cable is resistant against most usual oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Screened FRNC control cable HSLCH-JZ/-OZ/-JB

**faber  
kabel**

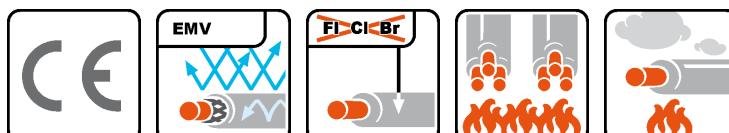

<b>conductor material:</b>	bare copper strand
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	FRNC-compound HI2
<b>covering of strand:</b>	Plastic-foil
<b>screen:</b>	Cu-braid, tinned
<b>screen coverage:</b>	70 %
<b>sheathing material:</b>	FRNC-compound HM2
<b>colour of outer sheath:</b>	gray RAL 7001
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>oil resistant:</b>	yes
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature, fixed:</b>	-30 - +70 °C
<b>temperature, moved/during installation:</b>	-5 - +70 °C
<b>bending radius, fixed installation:</b>	5 x DA
<b>bending radius, moved application:</b>	10 x DA

## HSLCH-JZ

## HSLCH-OZ

<b>nominal voltage Uo:</b>	300 V	300 V
<b>nominal voltage U:</b>	500 V	500 V
<b>test voltage:</b>	2 kV	2 kV
<b>core identification:</b>	gn-ye + numbers	numbers

**Application:** LSOH control cable for multiple purposes in control and measurement circuits with increased requirements to electromagnetic compatibility. For indoor use only. The cable is to a large extent resistant against oil and grease.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# PUR-sheathed control cable FACAB 100 F-CP

**faber  
kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	special PVC-compound
<b>screen:</b>	Cu-braiding
<b>screen coverage:</b>	85 %
<b>sheathing material:</b>	polyurethan
<b>colour of outer sheath:</b>	gray RAL 7001
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>oil resistant:</b>	EN 60811-2-1
<b>ozone resistant:</b>	yes
<b>maximum temperature at conductor:</b>	70 °C
<b>max. operating temperature, fixed:</b>	-40 - +80 °C
<b>temperature, moved/during installation:</b>	-5 - +80 °C
<b>bending radius, fixed installation:</b>	5 x DA
<b>bending radius, moved application:</b>	10 x DA
<b>nominal voltage U<sub>0</sub>:</b>	500 V
<b>nominal voltage U:</b>	300 V
<b>core identification:</b>	gn-ye + numbers

**Application:** Ruggedized PUR-sheathed control cable, highly resistant against wear and tear. The oil and coolant resistance allows application in industrial environments, machine building, engineering or even steel works. For medium mechanical stress without tension load and forced guiding. For indoor and outdoor use.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Polyurethan reeling cable FACAB PUR acc. to VDE 0250 (with ref. to)

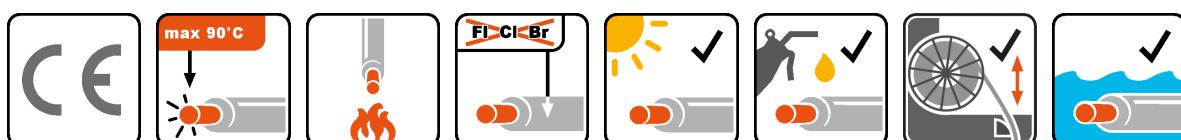

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	Polyester
<b>inner sheath:</b>	polyurethan
<b>self supporting element:</b>	textile
<b>sheathing material:</b>	polyurethan
<b>colour of outer sheath:</b>	black
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-50 - +90 °C
<b>temperature, moved/during installation:</b>	-40 - +90 °C
<b>bending radius, fixed</b>	6 x DA
<b>installation:</b>	
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>test voltage:</b>	2,5 kV
<b>core identification:</b>	colored acc. to HD 308; more than 5 cores: numbers

**Application:** As connection and control cable in lifting devices, hoisting plants and transporting machines for heavy mechanical load. The cable can be reeled and is resistant to oils. Due to the good UV- and damp-resistance the cable can be used indoors, outdoors and in water up to 50 m depth of water.

#### Additional information:

- driving speed up to 180 m/min
- textile braid between inner and outer sheath
- permanent tensile load without supporting element max. 25 N/sqmm

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# flat PVC-insulated cord H07VVH6-F acc. to VDE 0281-404

**faber  
kabel**

**conductor material:**

bare copper

**conductor construction:**

fine stranded, class 5

**insulation:**

PVC YI2

**sheathing material:**

PVC TM2

**flame retardant:**

VDE 0482-332-1-2/IEC 60332-1

**oil resistant:**

EN 60811-2-1

**maximum temperature at conductor:**

70 °C

**max. operating temperature, fixed:**

-40 - +70 °C

**temperature, moved/during installation:**

-5 - +70 °C

**nominal voltage Uo:**

450 V

**nominal voltage U:**

750 V

**test voltage:**

2,5 kV

**core identification:**

colours acc. VDE 0293 (HD 308); more than 5 cores: gn-ye + numbers

**Application:** PVC insulated flat cables are used as trailing cable for crane installations, floor conveyer systems and shelf control units. Max. suspension length 35 m.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Screened electronic cable LiYCY

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	fine stranded, class 5
<b>insulation:</b>	PVC
<b>screen:</b>	Cu-braid, tinned
<b>screen coverage:</b>	70 %
<b>sheathing material:</b>	PVC
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>oil resistant:</b>	EN 60811-2-1
<b>max. operating temperature,</b>	-30 - +80 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	-5 - +70 °C
<b>installation:</b>	
<b>operating capacity:</b>	120 nF/km
<b>nominal voltage Uo:</b>	250 V
<b>nominal voltage U:</b>	250 V
<b>test voltage:</b>	1,2 kV
<b>core identification:</b>	colours acc. DIN 47100

**Application:** For signal transmission between electronic devices, in computer systems or process control units with increased requirements to electromagnetic compatibility.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Electronic cable LiYCY/EB

<b>conductor material:</b>	bare copper	
<b>conductor construction:</b>	fine stranded, class 5	
<b>insulation:</b>	PVC	
<b>screen:</b>	Cu-braiding	
<b>screen coverage:</b>	85 %	
<b>sheathing material:</b>	PVC	
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1	
<b>maximum temperature at conductor:</b>	70 °C	
<b>max. operating temperature, fixed:</b>	-30 - +80 °C	
<b>temperature, moved/during installation:</b>	-5 - +70 °C	
<b>bending radius, fixed installation:</b>	10 x DA	
<b>insulation resistance:</b>	100 MΩ·km	
<b>specific inductivity:</b>	0,65 mH/km	
<b>operating capacity:</b>	<i>LiYCY/EB</i>	<i>LiYCY/EB TP</i>
<b>nominal voltage U:</b>	120 nF/km	120 nF/km
<b>test voltage:</b>	250 V	250 V
<b>core identification:</b>	1,2 kV	1,2 kV
	numbers	colours acc. DIN 47100

**Application:** For signal transmission between electronic devices, in computer systems or process control units with increased requirements to electromagnetic compatibility. Due to the blue outer sheath the cable is suitable for application in intrinsically safe circuits.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

DA outer diameter

G weight

Cu copper

# drag chain cable FACAB EFK 310 CY

**faber  
kabel**

**Specification/standard:** UL/CSA

**conductor material:** bare copper

**conductor construction:** fine stranded class 6

**insulation:** PVC

**inner sheath:** PVC

**screen:** Cu-braid, tinned

**screen coverage:** 85 %

**sheathing material:** PVC

**colour of outer sheath:** gray RAL 7001

**flame retardant:** VDE 0482-332-1-2/IEC 60332-1

**oil resistant:** EN 60811-2-1

**max. operating temperature, fixed:** -40 - +70 °C

**temperature, moved/during installation:** -5 - +70 °C

**bending radius, fixed installation:** 4 x DA

**bending radius, moved application:** 10 x DA

**Bending cycles, max.:** 3 Mio.

**Moving distance, max.:** 10 m

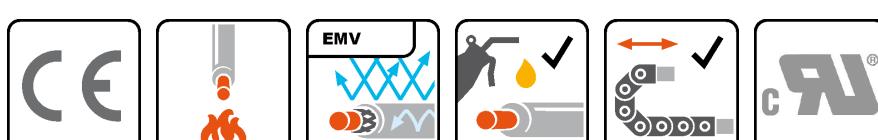

**insulation resistance:** 20 MΩkm

**nominal voltage U<sub>o</sub>:** 500 V

**nominal voltage U:** 300 V

**core identification:** gn-ye + numbers

**Application:** Highly-flexible data cable for continuous moved use under extreme conditions with particular requirements on EMC. It is applicable in standard drag chains without tensile load. The cable is flame retardant, and largely resistant against most chemicals used in industrial environment. Please pay attention to our instructions for the use of drag-chain cables.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Bus Cables EIB/KNX

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	solid, class 1
<b>insulation:</b>	PVC TI1
<b>stranding unit:</b>	pair
<b>stranding:</b>	layers
<b>sheathing material:</b>	PVC TM1
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>max. operating temperature,</b>	-30 - +70 °C
<b>fixed:</b>	
<b>specific inductivity:</b>	680 mH/km
<b>operating capacity:</b>	FACAB EIB
<b>loop resistance:</b>	100 nF/km
<b>nominal voltage U:</b>	73,2 Ohm/km
<b>test voltage:</b>	300 V
<b>core identification:</b>	4 kV
	colours acc. VDE 0815
	FACAB EIB FRNC
	100 nF/km
	73,2 Ohm/km
	300 V
	4 kV
	colours acc. VDE 0815

**Application:** Due to the increased test voltage and the special marking the cable is designed as bus cable in the EIB/KNX facility control system according to EN 50090. For the Instabus itself is used only the red/black pair (transmission of 24 V supply voltage plus data packages), the second pair (white/yellow) is redundant. The cable may be installed on or under plaster, in ducts and installation channels in dry or wet rooms.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FRNC power cable NHXH FE180/E30 acc. to VDE 0266

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	FRNC compound HI1
<b>sheathing material:</b>	FRNC-compound HM1
<b>colour of outer sheath:</b>	orange
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>fire resistance:</b>	FE 180 (IEC 60331)
<b>circuit integrity:</b>	E 30
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature,</b>	-5 - +70 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	12 x DA
<b>installation:</b>	
<b>nominal voltage U<sub>0</sub>:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted</b>	1,2 kV
<b>operating voltage in 3-phase systems:</b>	
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** For installation in dry and wet rooms, also for direct bedding in concrete, but not for direct burial in ground and not for use in water. The cable has improved flame retardant and may be used in public buildings with high safety requirements. Cables are halogen free, low smoke density and are fire resistant according to VDE 0472 part 814 (180 min., = IEC 60331). Furthermore the cable passed the test of 30 min. circuit integrity according to DIN 4102 part 12 (E 30) for all so called standard-installation systems (ladder, tray and ceiling) and is suitable for installation in fire alarm systems, safety lightning and other emergency electrical supply systems according to VDE 0108. A special test certificate about the circuit integrity is issued by the "Amtlichen Materialprüfanstalt für das Bauwesen". For calculation of electrical systems with circuit integrity has to be considered that electrical resistance of copper conductors at 800 °C is approximately four times higher than at 20 °C and the current carrying capacity is reduced respectively.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FRNC power cable NHXCH FE180/E30 acc. to VDE 0266

**faber**  
**kabel**

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	FRNC compound HI1
<b>concentric conductor:</b>	Cu
<b>sheathing material:</b>	FRNC-compound HM1
<b>colour of outer sheath:</b>	orange
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>fire resistance:</b>	FE 180 (IEC 60331)
<b>circuit integrity:</b>	E 30
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature,</b>	-5 - +70 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	12 x DA
<b>installation:</b>	
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** For installation in dry and wet rooms, also for direct bedding in concrete, but not for direct burial in ground and not for use in water. The cable has improved flame retardant and may be used in public buildings with high safety requirements. Cables are halogen free, low smoke density and are fire resistant according to VDE 0472 part 814 (180 min., = IEC 60331). Furthermore the cable passed the test of 30 min. circuit integrity according to DIN 4102 part 12 (E 30) for all so called standard-installation systems (ladder, tray and ceiling) and is suitable for installation in fire alarm systems, safety lightning and other emergency electrical supply systems according to VDE 0108. A special test certificate about the circuit integrity is issued by the "Amtlichen Materialprüfanstalt für das Bauwesen". For calculation of electrical systems with circuit integrity has to be considered that electrical resistance of copper conductors at 800 °C is approximately four times higher than at 20 °C and the current carrying capacity is reduced respectively.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FRNC power cable NHXCH FE180/E90 acc. to VDE 0266

<b>conductor material:</b>	bare copper
<b>conductor construction:</b>	class 1, from 25 sqmm class 2
<b>insulation:</b>	FRNC compound HI1
<b>concentric conductor:</b>	Cu
<b>sheathing material:</b>	FRNC-compound HM1
<b>colour of outer sheath:</b>	orange
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>fire resistance:</b>	FE 180 (IEC 60331)
<b>circuit integrity:</b>	E 90
<b>maximum temperature at conductor:</b>	90 °C
<b>max. operating temperature, fixed:</b>	-5 - +70 °C
<b>bending radius, fixed installation:</b>	12 x DA
<b>nominal voltage Uo:</b>	600 V
<b>nominal voltage U:</b>	1 kV
<b>maximum permitted operating voltage in 3-phase systems:</b>	1,2 kV
<b>test voltage:</b>	4 kV
<b>core identification:</b>	colours acc. VDE 0293 (HD308)

**Application:** For installation in dry and wet rooms, also for direct bedding in concrete, but not for direct burial in ground and not for use in water. The cable has improved flame retardant and may be used in public buildings with high safety requirements. Cables are halogen free, low smoke density and are fire resistant according to VDE 0472 part 814 (180 min., = IEC 331) Furthermore the cable passed the test of 90 min. circuit integrity according to DIN 4102 part 12 (E 90) for all so called standard-installation systems (ladder, tray and ceiling) and is suitable for installation in fire alarm systems, safety lightning and other emergency electrical supply systems according to VDE 0108. A special test certificate about the circuit integrity is issued by the "Amtlichen Materialprüfanstalt für das Bauwesen". For calculation of electrical systems with circuit integrity has to be considered that electrical resistance of copper conductors at 1000 °C is approximately 4,5 times higher than at 20 °C and the current carrying capacity has to be reduced respectively.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

## BRANDMELDEKABEL

<b>conductor material:</b>	bare copper
<b>insulation:</b>	FRNC compound HI1
<b>screen:</b>	foil
<b>drain wire:</b>	yes
<b>sheathing material:</b>	FRNC-compound HM2
<b>colour of outer sheath:</b>	red
<b>flame retardant:</b>	VDE 0482-266-2-4/IEC 60332-3-24 (Kat. C)
<b>smoke density:</b>	DIN EN 61034/IEC 61034
<b>halogen free:</b>	DIN EN 50267/IEC 60754
<b>fire resistance:</b>	FE 180 (IEC 60331)
<b>circuit integrity:</b>	E30-E90
<b>max. operating temperature,</b>	-5 - +50 °C
<b>fixed:</b>	
<b>bending radius, fixed</b>	7,5 x DA
<b>installation:</b>	
<b>operating capacity:</b>	120 nF/km
<b>core identification:</b>	colours + rings

**Application:** For signal transmission between electronic devices, in computer systems of process control units in fire-endangered areas with high person or real value concentration, for installation of circuits with circuit integrity E30/E90 according to DIN 4102 part 12, with tested cable systems. For fixed installation in dry and damp areas on certified carrier systems. By the special seath printing this cable is particularly designed for the use in fire signalisation systems.

**Additional information:** Stranding: cores twisted into pairs, 4 pairs layed up into sub-units (2-pairs cable stranded as one star-quad), sub-units layed up in layers

Core identification: The basic colour of each bunch are in continuous sequence: blue, red, grey, yellow, green, brown, white, black

The bundles are identified by the colour of the rings on the insulation.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# FACAB dataline LWL A-DQ(ZN)2Y

acc. to ISO/IEC 794, DIN VDE 0888

**faber  
kabel**

**fiber quality:** see data-sheet for fibers

**element:** filled loose tube

**metal free:** yes

**sheathing material:** polyethylene

**colour of outer sheath:** blue

**flame retardant:** no

**UV-resistant:** yes

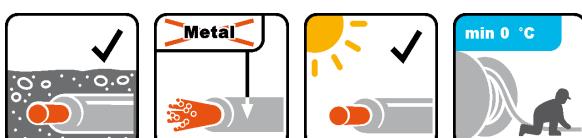

**max. operating temperature,** -20 - +70 °C

**fixed:**

**temperature, moved/during** 0 - 50 °C

**installation:**

**Application:** Optical cable with central or stranded loose tubes, glass yarn strength members/rodent protection and water blocking elements. Due to the wear resistant PE-jacket and good mechanical properties the cable is suitable for installation in trunking in industrial environments or for direct burial. The small bending radius and diameter allow as well an indoor application of the cable, for example as riser.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.

# Compensation cable AGL type KCA LiYY

<b>Specification/standard:</b>	DIN IEC 584
<b>conductor material:</b>	Ni/CrNi
<b>conductor construction:</b>	7x0,2
<b>insulation:</b>	PVC
<b>sheathing material:</b>	PVC
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>Temperature range:</b>	0 - 150 °C
<b>max. operating temperature,</b>	-5 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during installation:</b>	0 - 70 °C
<b>Insulation/sheath color:</b>	gn(+) - wh(-) / gn
<b>Class:</b>	2 (+/- 2,5 °C)

Table: Technical characteristics AGL Typ KCA LiYY

p/n	part name	D <sub>A</sub> [mm]	G [kg]
070328	Ausgleichsleitung LiYY 04X1,5 NiCr/Ni WS/GN Farbcodierung nach IEC, Typ K	8,2	130

# Compensation cable AGL type KCA LiY(St)Y

**faber**  
**kabel**

<b>Specification/standard:</b>	DIN IEC 584
<b>conductor material:</b>	Ni/CrNi
<b>insulation:</b>	PVC
<b>screen:</b>	Plastic coated Al-foil + solid copper drain wire
<b>sheathing material:</b>	PVC
<b>flame retardant:</b>	VDE 0482-332-1-2/IEC 60332-1
<b>Temperature range:</b>	0 - 150 °C
<b>max. operating temperature,</b>	-5 - +70 °C
<b>fixed:</b>	
<b>temperature, moved/during</b>	0 - 70 °C
<b>installation:</b>	
<b>Insulation/sheath color:</b>	gn(+)-wh(-)/gn
<b>Class:</b>	2 (+/- 2,5 °C)

**Application:** For connecting of thermo elements to measuring electronics.

The products and information presented here are for technical calculation only. They are subject to technical progress and in no way represent the ability of shipment. Outer diameters are approximately.
